This 3-part Trauma Informed Care series will guide early childhood educators working with infants, toddlers, preschoolers and early elementary aged children to understand trauma as well as its impact on young children's brains, behavior, learning and development. You will learn trauma-sensitive strategies to create environments that support children's health, healing and resiliency.

This is a 3 part series. Attendees will gain the most benefit if they are able to attend the entire series.

You can find additional Trauma Informed Care trainings, including options for Spanish speakers, through the 4C's BRIDGE Program. Please call or email Irma Zavala at 707-522-1413 x 226 ; izavala@sonoma4cs.org
