

4Cs Weekly Activities

4Cs Weekly Activities November 7th – November 11th - Theme: Family Tradition

Monday	Tuesday	Wednesday	Thursday	Friday
<p>Literacy Activity</p> <p>Let's go on a Multicultural Trip to learn about Food and Cultures in this Story, My Food Your Food! The story is written by Lisa Bullard and illustrated by Christine M. Schneider. Manuel's school is having food week where each child gets to tell about something special that his/her family eats. Go around the world sampling food and seeing how alike and different food can be! https://youtu.be/yP2bR1VOMDE</p> <p>You can do the same thing in your classroom where children get to take turns talking and sharing about the special food that they love eating with their family. What food Your family makes? Which county did your family come from?</p> <p>Also, teachers can ask families to share a recipe of their favorite food and then make a class recipe book.</p> 	<p>Art Activity</p> <p>Food around the world Collage</p> <p>Provide different magazine that have food pictures or food flyers Invite children to draw a picture of their family eating their favorites meal.</p> <p>Provide open ended materials such as paper plates, yarn, glue, different colors of construction paper, tissue paper, scissors, pom poms, and markers.</p> 	<p>Science Activity</p> <p>Taste around the world party!</p> <p>Use class recipe book to cook meals from different cultures with children then have a multicultural feast. Children get to try new food and share their experience with classmates. What food do they like?</p> <p>Teachers also can use The Science Chef Travels Around the World book by Joan D'Amico and Karen E. Drummond. This book is serving up a feast of fun with over 60 easy-to-do food experiments and recipes. Children will travel to 14 fascinating countries—starting in Canada and ending in Ghana—and along the way they will explore the science secrets of food.</p> 	<p>Mat Activity</p> <p>Favorite food graph</p> <p>Collect data from yesterday's activity then make a graph and list the name and picture of food kids tried or from the recipe book. For example, Spaghetti, taco, sushi, turkey and gravy. How many children like Spaghetti out of 20? Children can count and find out which food has the most # of kids and which has the least?</p> <p>Extension to Wednesday's cooking activity</p> <p>Make picture recipes with counting involved. I have attached an example of pizza topping ingredients cards. Just add the numbers in the squares provided.</p> 	<p>Social Emotional/ Movement Activity</p> <p>Dance to music from around the world!</p> <p>Provide scarves, play music from different cultures and invite children to have fun, dance and express how they feel with movement.</p> <p>Music is deeply rooted in our culture and can convey so many emotions, feelings and values through songs and instrumentation.</p> <p>What are some traditional songs you sing with your family?</p> <p>Teachers and children can share songs, dances and custom from their culture. This activity combines the social sciences with music and the arts by exploring songs and dances from around the world.</p> <p>It's amazing how we can express ourselves through music and dance. Often, these arts evoke memories in us that are everlasting! Not only that, they are an expression of culture, love, and tradition.</p>
